

Unit I Art shows and holidaying : lesson n2 Space Tourism

Travelling into space is something we could have only in our imagination a few years ago , but thanks to modern science and technology it has become a dream come true .

Why for space tourism	Why against space tourism
Space exploration is essential to the future mankind . To make scientific discoveries To observe the Earth from an outer space For entertainment / Space Tour However , only a few privileged people can undertake this venture because of the exorbitant price of the space flight . Space tourism is still expensive , only rich people can afford it . It can be worthy doing a suborbital flight as it can be a rich source of information	It's affordable only to a minority It can be afforded just by the wealthy (=well to do) .it's shameful to spend exorbitant prices on space flights while thousands of children die every day out of hunger and diseases It's dangerous

There are two divergent views about space tourism nowadays . (they argue that it's better to spend millions of dollars on social problems than on personal ..

On the one hand , some consider space tourism as a new and unique experience .It's an exceptional venture to take pleasure in watching earth from the outer space . On the other hand , some believe that space tourism is an exorbitant and needless experience

They believe , space Tourism is time effort and money-wasting experience . Besides It's much favorable to heal the human suffering in Africa and Asia instead of wasting fortunes on personal wishes and dreams .

Space tourism can help scientific research by allowing scientists to study the nature and the composition of the universe

Writing :

Write a report in your school magazine to express your opinion about space tourism .Is it a waste of money or a thrilling experience that is worth the fortune paid on it .

It's true that some people are in favor of this new phenomenon , believing that space trips are adventures worth living and that space flight participants have the right to use their money the way they see suitable .Well I strongly believe that space tourism is totally useless .First , it's a waste of money that should be used to solve some social problems on Earth like poverty , starvation , diseases and environmental issues .Second , it's useless

to spend fortunes on space trips just to admire Planet Earth from outer space .Third , it “s weird to go on space trips while children in Africa are struggling for a loaf of bread .Just for the sake of pleasure and the excitement of feeling weightless , millionaires are squandering fortune that may help millions of poor people .Fourth , space trips ² are still dangerous

Although most people are totally against space tourism , I strongly believe that this phenomenon is an
Despite its drawbacks , space tourism does have many benefits .First ,it an opportunity for space exploration .The money earned by space tourism can be used to make a scientific progress in space exploration .Second , it offers a special adventure that is worth undertaking .Third
In conclusion , I believe space tourism is a source of discovering other planets and exploring new resources .If I were a millionaire , I could certainly have a trip to the space .It’s an adventure worth living

Topic 2 : I think space tourism is crazy .While many poor people all over the world are dying due to malnutrition , hunger and diseases , some other extremely rich people are fulfilling their dream by travelling into space at exorbitant prices .wouldn’t it be better to spend that money on more humanitarian cause

Write a report to explain your point of view
